## Protection of the environment/

- Load the maximum amount of laundry to wash or dry for the
- particular programme. → Page 7: **Programme overview** Do not use prewash when washing laundry that is soiled
- et **Cotton Eco 60°C** to obtain good cleaning results with significantly lower energy consumption.
- Dose detergent according to the manufacturer's instructions
- If the laundry is to be dried in the appliance afterwards, select the highest selectable spin speed – because the more water that is spun out of the appliance, the less time and energy is
- If hand-washed laundry or dripping-wet laundry needs to be dried, please select the **Spin** programme with the option Programme selector for switching the machine on and off washing and drying without interruption, otherwise it will waste time and energy.

# Sort and load the laundry

Observe the care information provided by the manufacturer. Sort the laundry according to the information on the care labels.

Dilute viscous fabric softener and fabric conditioner with water. This prevents blockages.

Observe the instructions in the Important information section.  $\rightarrow Page 6$ 

Close the washer dryer door. Take care not to trap any items of clothing between the loading door and rubber seal.

## dd detergent and care product

Add the appropriate amount according to: Amount of laundry, level of soiling, water hardness (ask your water supply company) and manufacturer's instructions.

Pour liquid detergent into an appropriate dispenser and place in the drum. Only use commercially available low foam detergents in the washer dryer.

During operation: close the detergent drawer.

**Compartment II**: Detergent for the main wash, water softener. bleach, stain remover

# / Important information

## Preparing for washing and drying/Protecting the laundry and the machine

Check for metal items (paper clips, etc.). - Trousers, knitwear and knitted textiles, é.g. jersey garments, T-shirts or sweatshirts should be

Ensure that underwired bras are machine washable. Wash delicates in a net/bag (tights, curtains, underwired bras).

Fasten zips, do up any buttons.

Brush sand out of pockets and collars

Remove curtain hooks or place curtains in a net/bag. Only use tumble-dry textiles if you select drying.

Remove as much water as possible before tumble-drying. The recommended spin speed for cottons is more than 1000 rpm; for easy-care use more than 800 rpm.

In order to ensure uniform drying, sort the items according to fabric type and degree of drying

Items which require ironing do not have to be ironed immediately after being tumble-dried. It is a good idea to fold or roll them together for a while, so that any remaining moisture is evenly

To achieve good drying results, dry quilt covers, terry towels or other large textile items individually. Do not dry more than 4 terry towels (or 3 kg) at a time.

Before using for the first time

Do not put any laundry in the washer dryer. Turn on the tap, pour ½ a measuring cup of detergent into compartment II. Set the Fluff Clean 40 °C programme and select  $\diamondsuit$  Start/Reload. At the end of the programme, set the programme selector to  $\bigcirc$  Off.

After a long period of not using or moving the machine The syphon may be empty. If you select a single drying programme to prevent the hot and humid

steam from coming out of the empty syphon, the tap water will automatically flow into the machine to fill the syphon at the beginning of the programme.

Select the **Cotton Eco** programme. If required, pre-treat stains. Select the **Cotton Eco** programme or Cotton+Prewash programme.

## Load laundry of the same colour.

Pour soaking agent/detergent into compartment II according to the manufacturer's instructions. set Cotton 30 °C programme and select  $\odot$  Start/Reload. After approx. 10 minutes, select  $\odot$ Start/Reload. After the required soaking time, reselect  $\diamondsuit$  Start/Reload if the programme is to be continued or change the programme.

## Laundry must not be treated with fabric softener.

Starching is possible with all washing programmes using liquid starch. Pour the starch into the fabric softener compartment according to the manufacturer's instructions (if necessary clean it

dive manufacturer's instructions. **Do not** bleach laundry in the washing machine.

Dye should only be used in normal quantities. Salt may damage stainless steel. Always follow the

**ottons/Coloureds** (textiles made of cotton or linen such as underwear. T-shirts, sweaters, trousers and kitchen towels)

Release the button.

symbol flashes if the programme has been changed while childproof lock is activated. If the childproof lock is deactivated while the programme selector is in a different position from when the childproof lock was activated, the programme which is currently running be halted.

1 1	Please close the door immediately because the water level is rising. In the pause status, 80 t and 9E5 are displayed alternately.
	In pause status, \$\Pi \text{ii}\$ is flashing if the spin speed is high, please just wait to let the spin speed drop down. If \$\Pi \text{ii}\$ is continuously display in pause status then it means door is locked due to safety reasons(water level and/or temperature are too high). For the <b>washing programme</b> : If you need to open the door, wait for the temperature to drop or drain the water (e.g. select the <b>Spin</b> or <b>Empty</b> programme).  For the <b>drying programme</b> : If you need to open the door, wait for the temperature drop or set the time dry programme for 15 minutes to allow the laundry to cool down.
	The door cannot be locked/unlocked due to the high temperature of the door lock. Keep the machine switched on for about 1 minute. Then the machine can be locked/unlocked again.
dE .	The door cannot be opened after the drying programme because the temperature is too high. The cooling process will continue until this display disappears and the door can be

opened. If the laundry needs to be removed as soon as possible, select the Intensive Dry & programme and set the time dry function to 15 minutes to allow the laundry to cool down. No water supply during washing Tap turned on? Supply hose kinked or blocked?

Inlet filter blocked? Clean the filter →Installation and maintenance instructions, Page 8 No water supply during drying Tap turned on? Inlet filter blocked? Cooling water valve faulty?

Clean the drain pump →Installation and maintenance instructions, Page 8: outlet pipe/drainage hose blocked.

Flashing: The machine detected an imbalance in the drum that cannot be adjusted. The maximum spin speed cannot be reached in order to protect the machine. The washing solution will not be removed completely after spinning, and the subsequent drying programme is automatically stopped

f the drying cycle stops and hat flashes on the display, the cooling programme will keep running automatically until hot disappears and the door can be opened. Wash or dry small and large items of laundry together.

After the auto drying cycle, the symbols and End are displayed alternately, suggesting that the drying result may not be satisfactory. 

ther displays Switch off the appliance, wait 5 seconds and switch it back on.

If the display appears again, call customer service.

# • Safety instructions

- Read and follow the operating instructions as well as the installation and maintenance instructions and all other information enclosed with the washer dryer.

 Retain documents for subsequent use. Risk of electric shock - Never pull out the mains plug by pulling on the power cord.

ocking themselves in and putting their lives at risk.

Never insert/pull out the mains plug with wet hands. For worn-out appliances:

Pull out the mains plug Sever the power cord and discard together with the plug. Destroy the lock on the washer dryer door. This will prevent children from

Risk of suffocation Risk of poisoning

Keep packaging, plastic film and packaging parts out of the reach of

Risk of explosion

 Keep detergents and care products out of the reach of children. Items of laundry pretreated with cleaning agents containing solvents, e.g. stain remover/cleaning solvents may lead to an explosion after being loaded into the washer dryer. Rinse items of laundry thoroughly by hand

Washer dryer door may become very hot.

Take care when draining hot detergent solution. Do not climb onto the washer dryer. Do not lean on the washer dryer door when it is open.

Do not touch the drum in case it is still spinning. Ensure that the pump cap is screwed on while the machine is running to prevent water from leaking out and coming into contact with moving pump

If a drying programme was interrupted, the washer dryer and the laundry may be very hot, select Intensive Dry \* or Gentle Dry \* and set the time dry programme to 15 minutes to allow the laundry to cool down, then remove the laundry.

## What to do if ...

## Intended use

- For domestic use only.
- For washing machine-washable fabrics in a detergent solution.
   To be operated with cold mains water and commercially available low foam detergents and care products which are suitable for use in a front loaded washer dryer.

- Do not leave children unattended near the washer dryer.
- Keep pets away from the washer dryer!
- The washer dryer is not to be used by children or persons not familiar with the operating instructions.
- Install and operate the washer dryer in a room with a drain.
- In order to ensure your safety, you must plug the cable into a socket which is correctly connected to an earth connection.

# Preparation

Before using for the first time  $\rightarrow$  Page 6

The washer dryer was tested before leaving the factory. To remove any water left over from the testing procedures, run the first cycle of the **Fluff Clean** programme without any laundry. →*Page 6:* **Before using for the first time** 

Correct installation according to separate Installation and maintenance instructions.

#### Check the machine

- Never switch on a damaged machine.
- Inform your after-sales service.

#### Insert the mains plug

With dry hands only.
Only hold the plug by the plug body.

## Turn on the tap

 Due to the use of the water condensation technology for drying, please keep the connected water tap open during the drying process, otherwise proper drying cannot be guaranteed.

#### Protection of the environment/ Conservation tips

- Load the maximum amount of laundry to wash or dry for the particular programme. →Page 7: Programme overview
- Do not use prewash when washing laundry that is soiled normally.
- Select Cotton Eco 60°C to obtain good cleaning results with significantly lower energy consumption.
- Dose detergent according to the manufacturer's instructions and water hardness.
- If the laundry is to be dried in the appliance afterwards, select the highest selectable spin speed – because the more water that is spun out of the appliance, the less time and energy is required to dry it.
- If hand-washed laundry or dripping-wet laundry needs to be dried, please select the Spin programme with the option washing and drying without interruption, otherwise it will waste time and energy.

## Drying

# Washing & Drying without interruption

#### Programme selector

# Display panel/ Option buttons/ Additional functions

Start/ Reload

Programme selector for switching the machine on and off and for selecting the programme. Can be rotated in either direction.

Detailed programme overview. →Page 7/8

2

## Sort and load the laundry

- Observe the care information provided by the manufacturer.
- Sort the laundry according to the information on the care labels.
- Sort the laundry according to type, colour, degree of soiling and temperature.
- Remove any foreign objects as there is a risk of rusting.
- Do not excéed the maximum load. →Page 7
- If drying programme is selected. →Page 4: Sort and load the laundry (drying)
- Observe the instructions in the Important information section.  $\rightarrow Page 6$
- Load both large and small items of laundry.
- Close the washer dryer door. Take care not to trap any items of clothing between the loading door and rubber seal.

- Add the appropriate amount according to: Amount of laundry, level of soiling, water hardness (ask your water supply company) and manufacturer's instructions. Pour liquid detergent into an appropriate dispenser and place in the drum.
- Only use commercially available low foam detergents in the washer dryer.
- During operation: close the detergent drawer.
- Dilute viscous fabric softener and fabric conditioner with water. This prevents blockages.

**Compartment** %: Fabric softener Compartment I: Detergent for pre-wash

## Set and adjust the programme

Turn the programme selector to the desired washing programme.

→ Page 7: **Programme overview** 

Use the option buttons and additional functions.  $\rightarrow$  Page 9/10

All buttons are sensitive and a gentle touch is adequate! If you press and hold the °C (Temp.), © (Spin) or ( (Finish-in) option buttons, the setting options automatically scroll through.

If washing and drying without interruption is desired (only possible for Cotton, Cotton+Prewash, Cotton Eco, Easy-Care, Mixed Fabrics, Rinse, Spin, Rapid 15' wash&dry 60' and Outdoor Wear), touch the \*\* (Dry) button to change the drying mode as shown below:

- EFF (drying mode is not activated)
- Intensive Dry 名山上 I, Intensive Dry 名山上之 (초 indicator light is on, Intensive Dry is selected)
- Gentle Dry 유교는 L. Gentle Dry 유교는 (※ indicator light is on, Gentle Dry is selected). Detailed description of the drying mode.  $\rightarrow$ *Page* 9.

Select drying modes. → Page 7, Programme overview.

For Mixed Fabrics, Rinse and Spin, please select the appropriate drying mode (\* Intensive Dry or \* Gentle Dry) for the laundry. For other programmes, it is recommended to use the default drving mode.

- $\boxtimes = do not tumble-dry care symbol.$
- Woollens or items containing wool. **Risk of shrinking!**
- Delicate fabric (silk, synthetic net curtain). Risk of creasing!
   Items containing foam rubber or a similar material.
- Items which have been treated with flammable solvents, such as stair removers, petrol, paint thinners. Explosion hazard!
- Items still containing hair lacquer or similar substances. Dangerous vapours!

Do not exceed the maximum drying load.  $\rightarrow$ Page 7

## Set and adjust the drying programme

- Turn the programme selector to \* Intensive Dry or \* Gentle Dry → Page 7: **Programme overview** 

The default drying mode is Eu. ; in this mode the drying time is automatically adjusted to the size of the load to obtain cupboard of laundry that is ready to fold and stack in the cupboard. You can change the drying mode to Rule? in order to obtain extra dry laund or change it to time dry and set the drying time by touching the  $\underline{x}$  **(Dry)** button. To estimate or set the drying time. → Page 8: Drying table

All buttons are sensitive and a gentle touch is adequate! If you press and hold the  $\bigcirc$  (Finish-in) option button, the setting options automatically scroll through.

Select 

Start/Reload

... Drying

... Washing/Washing + Drying

Select 

Start/Reload

3

## Remove the laundry

Open the washer dryer door and remove the laundry. Leave the washer dryer door and detergent drawer open so that any residual water can evaporate!

## Turn off the tap

Not required for Aqua-Stop models.  $\rightarrow$  Installation and maintenance instructions:

#### Switch off

Set the programme selector to Off.

## End of programme when ...

... Start/Reload indicator light goes out and - U - or - - - - (if - - - - was selected, no final spin/drain) appears on the display panel, the buzzer sounds. Set the volume of the buzzer.  $\rightarrow$  Page 10

If - - - - was selected and - - - - is displayed, touch the ◆ Start/Reload button. - The programme continues draining the water and spinning the laundry at the default speed (the default spin speed can be changed prior to touching the  $\Phi$ Start/Reload button).

If you only want to drain the water, touch the  $\oplus$  Start/**Reload** button again when draining has finished and spinning starts. The programme is paused and the door lock is released. You can remove the laundry.

If hot flashes on the display panel before the drying cycle has finished →the drum has a high temperature. The cool-down programme runs until the drum has cooled down.

## Changing the programme ...

If you have selected the wrong programme by mistake:

- Reselect the washing/drying programme.
- If required, adjust the programme setting and/or select additional functions. → Page 9/10
- Select **Start**/Reload.

## Pausing the programme ...

- Touch the 

  Start/Reload button.
- Follow the instructions in the display panel: when O lights up and YES appears in the display, the door can be opened. If required, add /remove a laundry item; if  $\Pi \square$  is displayed, the door cannot be opened due to a high water level in the drum or a high temperature.
- Touch **Start**/Reload button to continue the programme.
- The pause function cannot be activated during the drving cycle.

## ... or terminate the programme

Washing programmes with a high temperature:

- Cool down laundry: Select **Rinse** and touch **♦ Start**/Reload.

Washing programmes with a lower temperature:

- Select Spin and touch \$\Delta\$ Start/Reload.

Drying programme:

 Select \* Intensive Dry or \* Gentle Dry, touch the \*\* (Dry) option button, set a drying time of 15 minutes and then touch \$\Delta\$ Start/Reload button.

# Important information

#### Preparing for washing and drying/Protecting the laundry and the machine

Empty any pockets.

Check for metal items (paper clips, etc.).

- Trousers, knitwear and knitted textiles, e.g. iersey garments, T-shirts or sweatshirts should be
- Ensure that underwired bras are machine washable.
- Wash delicates in a net/bag (tights, curtains, underwired bras).

- Fasten zips, do up any buttons.

- Brush sand out of pockets and collars.
- Remove curtain hooks or place curtains in a net/bag.

- Only use tumble-dry textiles if you select drying.

- Remove as much water as possible before tumble-drying. The recommended spin speed for cottons is more than 1000 rpm; for easy-care use more than 800 rpm.
- In order to ensure uniform drying, sort the items according to fabric type and degree of drying
- Items which require ironing do not have to be ironed immediately after being tumble-dried. It is a good idea to fold or roll them together for a while, so that any remaining moisture is evenly
- To achieve good drying results, dry guilt covers, terry towels or other large textile items individually. Do not dry more than 4 terry towels (or 3 kg) at a time.

#### Before using for the first time

Do not put any laundry in the washer dryer. Turn on the tap, pour ½ a measuring cup of detergent into compartment II. Set the **Fluff Clean 40 °C** programme and select **Start**/Reload. At the end of the programme, set the programme selector to Off.

#### After a long period of not using or moving the machine

The syphon may be empty. If you select a single drying programme to prevent the hot and humid steam from coming out of the empty syphon, the tap water will automatically flow into the machine to fill the syphon at the beginning of the programme.

#### Laundry with different levels of soiling

Wash new items separately.

Do not prewash.

If required, pre-treat stains,

Select the **Cotton Eco** programme.

Load less laundry.

If required, pre-treat stains. Select the Cotton Eco programme or Cotton+Prewash programme.

#### Soaking

Load laundry of the same colour.

Pour soaking agent/detergent into compartment II according to the manufacturer's instructions. Set Cotton 30 °C programme and select  $\diamondsuit$  Start/Reload. After approx. 10 minutes, select  $\diamondsuit$ Start/Reload. After the required soaking time, reselect  $\oplus$  Start/Reload if the programme is to be continued or change the programme.

#### Starching

Laundry must not be treated with fabric softener.

Starching is possible with all washing programmes using liquid starch. Pour the starch into the fabric softener compartment according to the manufacturer's instructions (if necessary clean it first).

#### Dyeing/bleaching

Dye should only be used in normal quantities. Salt may damage stainless steel. Always follow the dye manufacturer's instructions. Do not bleach laundry in the washing machine.

# Programme overview (see also the information on page 9,10)

Drogrammos	ڕ	тах.	max. load (kg) *	*	Type of foundations information
r og ammes	)	Washing	糾	*	
Cotton	06 -ploo				Standard washing programme for hard-wearing textiles made of cotton or linen.
Cotton + Prewash cold - 90	06 – ploo <b>t</b>	7.0	4.0		Energy-intensive programme for heavily soiled hard-wearing tex⁻ <b>Quick Wash ≅, Extra Rinse ङ</b> tiles made of cotton or linen.
Cotton Eco	09 – ploo				Long washing programme with low energy consumption, for heavily soiled hard-wearing textiles made of cotton or linen.
Easy-Care	09 - ploo	ر ب		ى 5	Textiles made of synthetic materials or blended fabrics.
Mixed Fabrics	09 - ploo	) )	3.5	J. J	Mixed load consisting of textiles made of cotton and synthetic fibres.
Wool	cold - 40				Hand and machine-washable wool or wool-rich textiles. Especially gentle washing programme to prevent shrinkage, Jonge programme pauses (textiles rest in defendent solution) e.g. cashmere, mohair or angora. Also suitable for
					hand washable silk.
Delicates/Silk	cold - 40	2.0			For delicate, washable textiles, e.g.made of silk, satin, synthetic fibres or blended fabrics.
Outdoor Wear	cold - 40		l	1.0	Weatherproof and outdoor clothing with membrane coating and was was weather still with membrane coating and water-resistant textiles.
Rapid 15' wash&dry 60'	cold - 40 3.5/	3.5/2.0**	1.0		Textiles made of synthetic materials or blended fabrics. Quick Wash ♥, Extra Rinse ❖
Intensive Dry ₩		4.0	4.0		Cotton/coloureds textiles, dry at normal heat setting.
Gentle Dry	ı	2.5		2.5	Easy care textiles, dry at low heat setting.
Rinse			0	ى 5	Extra rinse with spin.
Spin	I	7.0	) F	J. 7	Extra spin with selectable spin speed.
Empty	I	l			Draining of the water inside the drum, e.g. after rinse stop.
Fluff Clean	cold, 40,				Special programme for drum hygiene or fluff removal 90° = antibacterial programme, do not use detergent
	06				40° = antibacterial programme, special drum cleaning detergent can be used cold = fluff rinsing programme, to remove fluff accumulated in the tub during drying cycles.

The programmes are time-controlled for lightly soiled textiles. If textiles are heavily soiled, reduce the load or cancel the additional function **© Quick Wash.**\* Max. load according to EN50229. Values in blue: Max load for drying; Values in black. Max load for washing.

\*\* Reduced load for **Quick Wash ©** option.

- Programme setting for testing and energy labelling in accordance with EN50229, EU directive 96/60/EC. For the washing cycle, please select **Cotton Eco** with default settings. For the drying cycle, please select **Intensive Dry** with the  $\mathbb{A}_{\omega} \models \mathbb{B}$  option.
- Programme setting for testing according to valid version of EN60456.
- Note for comparative testing: when using the test programmes, wash using the specified load amount and the maximum spin speed. \*\*\* The values deviate from the indicated values depending on water pressure, water hardness, and inlet temperature, ambient temperature, type, amount and degree of soiling of the laundry, detergent used, fluctuations in the power supply and selected additional func-

## Display and option buttons

#### Display symbols

- → Washing: On if the washing cycle is running.
- running.
- © Spin: On if the spin cycle is active.
- Drying: On if the drying cycle is active.
- **Overdosage**: Foam detected, Maybe too much detergent.
- Childproof lock: On if the childproof lock is activated. Activate/deactivate the childproof lock  $\rightarrow$ Page 10
- O Door: On if door can be opened.

#### Display information

In the standby mode, the

following information for the

selected programme will be

the programme duration in

minutes, the maximum load

recommendation in kg, the

temperature in °C and the

default setting for the

in rpm.

shown alternately in the display:

default setting for the spin speed

Example of display may vary

depending on selections.

Time, e.g. :: 312\*: Remaining time of programme, or °C, e.g. 50 °C \*: The temperature which has been set for the selected programme.

kg, ∃,□\*: Maximum load recommendation in kg for the selected washing/drying programme. →Page 7, **Programme** 

- Dry, drying mode and drying time:
- Hub: 1: Cupboard dry mode. Dries the items until they are only slightly damp. The items can be folded or hung in a cupboard to finish drying. Suitable for normal fabrics which do not need
- है। Extra dry mode. Dries the items until they are completely dry. Suitable for thick or guilted fabrics, such as towels and bathrobes, which do not need ironing.
- **TIFF:** The drying programme is off.
- $\exists \exists \exists : Time dry, drying time defined manually. \longrightarrow Page 10.$ \*\* (Dry) button
- **YE5**: On if the door can be opened when the programme was
- ПП: On if the door cannot be opened when the programme was paused.
- 🗓 -: End of programme, or - - - : End of programme with the - - - setting. Set the volume of the signals.  $\rightarrow$ Page 10  $E: \mathbb{R}^*$ : Information on the display.  $\longrightarrow$  Page 11

#### **Option buttons**

You can change the spin speed and temperature even while the selected programme is running. The effects depend on how far along the programme has progressed.

#### °C (*Temp.*)

You can change the indicated washing temperature. The maximum washing temperature that can be selected depends on the programme that has been selected.  $\rightarrow$  Page 7

#### (Spin)

You can change the indicated spin speed. The maximum spin speed which can be selected depends on the selected programme. If - - - is selected, the load is held in the rinsing water.

#### () (Finish in)

When you select a programme, the respective programme duration is displayed. You can delay the start of the programme before it begins. The finish-in time indicates when the programme will be finished. It can be set in hourly increments up to a maximum of 24 hours.

Press and hold the (Finish in) button until the required number of hours is shown (h=hour). Select **Start**/Reload, the door is locked.

## Additional functions and Individual settings

#### **※※ (Dry)**

You can activate, deactivate and set the drying function by touching this option button. Mode of washing and drying without interruption is auto dry; when the single drying programme is selected, you can choose auto dry, or time dry with a desired drying time. Set the drying time →refer to page 8. Drving table

#### Additional functions

#### See also **Programme overview** → Page 7

Select or cancel the additional function with the Squick Wash or Extra Rinse button:

- The indicator lights of the buttons come on if additional functions are active.
- Switching off the additional option; touch the button again. The indicator light goes out.
- You can select two additional functions at the same time for some programmes.

### Quick Wash \$

Shorten the washing time. For slightly soiled items.

#### Extra Rinse 😅

Additional rinse cycles, extended washing time. For regions with very soft water or for further improvement of the rinsing result.

#### ◆ Start/Reload

For starting or pausing the washing/drying programme.

#### Hibernate mode

The back light of the display will go out if the machine is not operated for 5 minutes before the programme starts, when the finish-in time starts counting down, or the programme ends. Touch any button first to activate the back light, then you can operate the machine.

#### Signal volume (for button signal and information signal)

1. Activate the setting mode for the signal volume

# 2. Set volume for ...

\*If required, set repeatedly.

#### Childproof lock <∞

Programme will not be changed by accidental operation.

To activate the childproof lock:

- After the programme starts or the finish-in time is activated → Page 9, press and hold the (Finish in) button for 5 seconds;
- Release when the supersupersup symbol lights up. If button signal is on, an acoustic signal will be heard.

When the programme ends, the \$\Displaystyle Start/Reload indicator remains on to remind you to deactivate the childproof lock.

To deactivate the childproof lock:

- Touch the () (Finish in) button until the - symbol turns off.

the volume\*

Release the button.

symbol flashes if the programme has been changed while childproof lock is activated. If the childproof lock is deactivated while the programme selector is in a different position from when the childproof lock was activated, the programme which is currently running be halted.

# Information on the display

- Please close the door immediately because the water level is rising. F: F: 1 In the pause status, RQ and YE5 are displayed alternately.
  - In pause status, 👊 is flashing if the spin speed is high, please just wait to let the spin speed drop down. If RB is continuously display in pause status then it means door is locked due
  - to safety reasons(water level and/or temperature are too high). For the washing programme: If yoù need to open the door, wait for the temperature to drop or drain the water
  - (e.g. select the **Spin** or **Empty** programme). For the drying programme: If you need to open the door, wait for the temperature drop or
- set the time dry programme for 15 minutes to allow the laundry to cool down. The door cannot be locked/unlocked due to the high temperature of the door lock. Keep the 出出
- machine switched on for about 1 minute. Then the machine can be locked/unlocked again. The door cannot be opened after the drying programme because the temperature is too high. The cooling process will continue until this display disappears and the door can be
  - opened. If the laundry needs to be removed as soon as possible, select the Intensive Dry & programme and set the time dry function to 15 minutes to allow the laundry to cool down.
- No water supply during washing Tap turned on? Supply hose kinked or blocked?
- Inlet filter blocked? Clean the filter →Installation and maintenance instructions, Page 8 No water supply during drying
- Tap turned on? Inlet filter blocked? Cooling water valve faulty? Clean the drain pump →Installation and maintenance instructions. Page 8:
- outlet pipe/drainage hose blocked. Flashing: The machine detected an imbalance in the drum that cannot be adjusted. The maximum spin speed cannot be reached in order to protect the machine. The washing
  - solution will not be removed completely after spinning, and the subsequent drying programme is automatically stopped.
    - If the drying cycle stops and hat flashes on the display, the cooling programme will keep running automatically until hat disappears and the door can be opened.
    - Wash or dry small and large items of laundry together.
    - After the auto drying cycle, the symbols and  $E \cap d$  are displayed alternately, suggesting that the drying result may not be satisfactory.
      - H !: the amount of laundry is too much. ₩: the amount of laundry is too little.

Switch off the appliance, wait 5 seconds and switch it back on. Other displays If the display appears again, call customer service.

# Safety instructions

- Read and follow the operating instructions as well as the installation and maintenance instructions and all other information enclosed with the washer dryer.
- Retain documents for subsequent use.
- Risk of electric shock Never pull out the mains plug by pulling on the power cord.
  - Never insert/pull out the mains plug with wet hands.
- For worn-out appliances: Risk of death
  - Pull out the mains plug.
  - Sever the power cord and discard together with the plug.
  - Destroy the lock on the washer dryer door. This will prevent children from locking themselves in and putting their lives at risk.
- Risk of suffocation

1 ( kg ) 1 ( k

- Risk of poisoning Risk of explosion
- Keep packaging, plastic film and packaging parts out of the reach of children.
- Keep detergents and care products out of the reach of children. - Items of laundry pretreated with cleaning agents containing solvents, e.g.
- stain remover/cleaning solvents may lead to an explosion after being loaded into the washer dryer. Rinse items of laundry thoroughly by hand beforehand.
- Risk of injury
- Washer dryer door may become very hot.
- Take care when draining hot detergent solution.
- Do not climb onto the washer dryer.
- Do not lean on the washer dryer door when it is open.
- Do not touch the drum in case it is still spinning.
- Ensure that the pump cap is screwed on while the machine is running to prevent water from leaking out and coming into contact with moving pump
- If a drying programme was interrupted, the washer dryer and the laundry may be very hot, select Intensive Dry \* or Gentle Dry \* and set the time dry programme to 15 minutes to allow the laundry to cool down, then remove the laundry.

## What to do if ...

the following washing cycle.

•	Water is leaking out.	<ul><li>Fit/refit the drainage hose correctly.</li><li>Tighten the screw connection of the supply hose.</li></ul>
	There is no water supply.  Detergent is not dispensed.	<ul> <li>→ Start/Reload not selected?</li> <li>Tap not turned on?</li> <li>Filter blocked? Clean the filter. →Installation and maintenance instructions, Page 8</li> <li>Supply hose kinked or trapped?</li> <li>There is water in the drum already.</li> </ul>
•	Washer dryer door cannot be opened.	<ul> <li>Safety function active. Programme stopped? →Page 5</li> <li> (no final spin/drain) selected? →Page 5</li> <li>Can be opened by emergency release only. →Page 13</li> <li>Childproof lock activated? Deactivate it →Page 10</li> </ul>
	Programme does not start.	<ul> <li>- ♦ Start/Reload or ⑤ (Finish in) selected?</li> <li>- Washer dryer door closed properly?</li> </ul>
•	Detergent solution is not drained.	<ul> <li>Clean the drain pump. →Installation and maintenance instructions, Page 8</li> <li>Clean the waste pipe and/or drainage hose.</li> </ul>
	Water not visible in the drum.	- Not a fault - water below the visible area.
•	The spin result is not satisfactory.	<ul> <li>Wash small and large items of laundry together.</li> <li>Selected speed too low? →Page 9</li> </ul>
	The spin cycle performs several times.	<ul> <li>This is not a fault – the unbalanced load detection system adjusts the imbalance.</li> </ul>
	Compartment & is not rinsed out completely.	<ul> <li>Remove the insert. Clean the detergent drawer and insert it again.</li> <li>→Installation and maintenance instructions, Page 7</li> </ul>
	Odour forms in the washer dryer.	<ul> <li>Run the Fluff Clean cold programme without laundry.</li> <li>Use standard detergents.</li> </ul>
•	Foam escapes from the detergent drawer.	<ul> <li>Too much detergent used?</li> <li>Mix 1 tablespoon of fabric softener with ½ litre of water and pour this mixture into compartment II in the detergent drawer.</li> <li>Reduce the detergent dosage for the next wash cycle.</li> <li>Use commercially available low foam detergents and care products which are suitable for use in the washer dryer.</li> </ul>
•	Excessive noise, vibrations and "wandering" during the spin cycle.	<ul> <li>Are the appliance's feet fixed?</li> <li>Secure the appliance's feet. →Installation and maintenance instructions, Page 5</li> <li>Have the transport bolts been removed?</li> <li>Remove the transport bolts. →Installation and maintenance instructions, Page 3</li> </ul>

What to do if			
	•	Drying takes too long.	<ul> <li>According to the water cooling technology a higher water temperature will result in lower drying performance and an increased drying time.</li> <li>If dripping laundry is put inside the drum to dry directly or laundry has not been spun well enough before drying, the drying time will be longer.</li> <li>Run the Fluff Clean cold programme without laundry to remove fluff which has accumulated in the tub and drying system.</li> </ul>
	•	Drying programme does not start.	<ul> <li>Drying programme not selected? →Page 10: ※※ (Dry) option button and Page 7: Programme overview</li> <li>Washer dryer door not closed properly?</li> <li>⑤ flashes? Wash small and large items of laundry together.</li> <li>The pump is blocked. →Installation and maintenance instructions, Page 8: Clean the pump</li> </ul>
	•	The drying result is not satisfactory (laundry is not dry enough).	<ul> <li>Water temperature is too high.</li> <li>The laundry has not been spun well enough before drying – always set the highest selectable spin speed for all washing programmes.</li> <li>Machine overloaded: please follow the load recommendation in the programme table and on the load display, do not overload the machine, as the maximum load for drying is lower than for washing. Unload the machine after washing a maximum load claundry and separate the load into two drying cycles.</li> <li>The line voltage of the power supply is too low, too high, or unstable.</li> <li>Thick multilayered textiles or textiles with thick fillings – these textiles easily dry on the surface, but not inside. This drying</li> </ul>

A small amount of water can be seen dripping on the dried is opened.

- Opening the door quickly creates a suction effect which can pull any remaining water drops from the drying system.

process may take longer. Please use time drying programmes

load of laundry when the door - Open the door slowly. Avoid jerking the door open.

to dry these kinds of textiles completely.

If you cannot correct a fault yourself or a repair is required:

- Turn the programme selector to Off and disconnect the mains plug.
- Turn off the tap and call customer service.

# Emergency release e.g. in the event of power failure

The programme will continue to run when the power is restored. However, if the laundry has to be removed, the washing machine door can be opened as follows:

Risk of scalding.

The detergent solution and laundry may be hot.

If possible, leave it to cool down.

Do not open the washer dryer door if water can be seen through the glass.

- Set the programme selector to Off and disconnect the mains
- Drain the detergent solution. →Installation and maintenance instructions, Page 8
- Pull the emergency release with a tool and release it. The washer dryer door can then be opened.

## Washer dryer

## **Operating instructions**

en

WD14H320GB

Read these instructions before switching on the washer dryer. Also follow the separate Installation and maintenance instructions.
